

MIT Medical Device Design Sponsorship Invitation

Join us in inspiring the next generation of healthcare innovators!

Taught since 2003, MIT's Medical Device Design program provides students with a hands-on, industry modelled design experience.

Graduate Students and Seniors from mechanical engineering, electrical engineering, HST and other majors learn the nuts and bolts of designing hardware for healthcare. Students work in small teams to prototype new medical device technologies that address real clinical challenges, identified by clinical and industry mentors. Featured guest speakers and case studies on healthcare industry specific regulatory and reimbursement considerations complement the project work.

Projects span surgical instruments, diagnostic devices and research tools and frequently launch ongoing collaborations. Most importantly, alumni regularly become industry leaders!

We rely on your support to provide an incomparable teaching experience during the course and beyond. We invite you to join our community of innovators, build long-term relationships with MIT and collaborate with young professionals!

All support of engineering education is tax deductible.

Contact: 2.75-admin@mit.edu

We provide our INDUSTRY SPONSORS opportunities to:

ENGAGE

Meet students, faculty researchers and clinicians

MENTOR

Share professional experience and wisdom
Suggest team projects

RECRUIT

Identify top talent for internships and full-time positions, now and in the future

Teaching Team:

Alex Slocum, Gio Traverso, Ellen Roche, Nevan Hanumara, Anthony Pennes, Dave Custer
